**#WANT!** The most awesome tent ever? The Tentsile Stingray Air can be suspended in the air, at any height using 3 straps to anchor it between trees (or whatever else is available), or set up on the ground.

When in the air it essentially combines a tent with a triple hammock that can take the weight of 3 adults and all their gear. It comes with a rope ladder and there are hatches to allow entry from below when suspended, or from the side when pitched on the ground.

Taking just 5-10 minutes to assemble, these amazing tree tents offer a practical solution for dealing with creepy crawlies, critters, uneven ground and flooding. They're also brilliant for observing wildlife. We want one!
